1. Product Characteristic

Dipropylene Glycol has fewer impurity peaks and has good co solubility with water, oil, and hydrocarbons. The products can be used as solvents and moisturizers in different cosmetic applications and are widely used in fragrance, personal care, and cosmetics.

2. Main Standard and Prosperities

Product Name:	Dipropylene Glycol- Fragrance Grade
Chemical Formula:	C ₆ H ₁₄ O ₃
CAS:	25265-71-8
Appearance:	Colorless, transparent, and viscous liquid without visible mechanical impurities
Package:	Galvanized iron drums or plastic drums in 25 kg, 200 kg or 215 kg; ISO TANK

3. Technical Specifications

Item	Standard
Dipropylene glycol, w/%	≥99.5
Moisture, %	≤0.20
Color (Pt-Co), Hazen	≤10
Specific Gravity(d ₄ ²⁰)	1.020-1.025
Acidity (calculated as acetic acid), mg/kg	≤0.003
